I. About Calculator

Calc is simple calculator that can do basic mathematical function that include

- 1. Almost arbitrary precision integers and floating-point numbers
- 2. Mathematical operations such as addition, subtraction, multiplication, division, exponentiation, square roots
- 3. Trigonometric functions

II. Installation manual

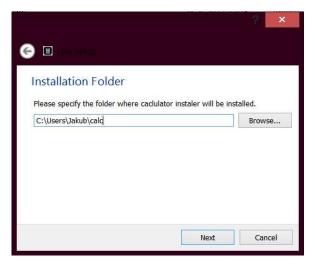

At first click on calc or execute calc.exe by command prompt.

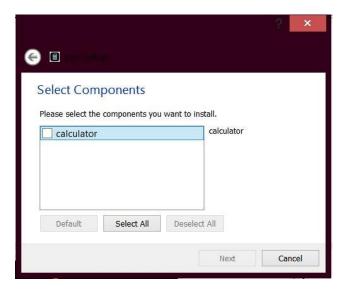

When is installer window open click on next.

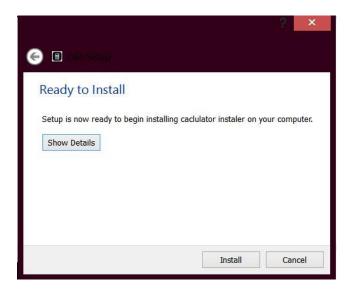

In next step choose path where calculator be installed and click next.

After that click on select all or part what you want to install

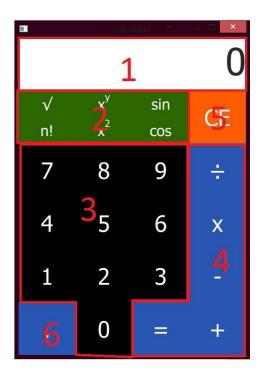

In last step simply click on install and program will be installed in directory what you choose before 2 steps.

After Installation end simply click on finish.

III. General use

i. Interface description

- 1. Is a place for result of mathematical function
- 2. Is advanced mathematical function
- 3. Is inputs for math function
- 4. Is mathematical function
- 5. Button for reset actual calculations and initialized for new
- 6. Button for decimal numbers

ii. Functions

- a. Basic math functions
 - 1. Addition- add two numbers
 - 2. Subtraction- substitute two numbers
 - 3. Multiplication- multiple two numbers
 - 4. Division- divide two numbers

b. Advanced Math

- 1. Root- do square root of number
- 2. Factorial- do factorial of number
- 3. Power1- do power from number on x which is user input number
- 4. Power2- do second power of number
- 5. Sin- do sin of angle
- 6. Cos- do cos of angle

iii. Useful tips

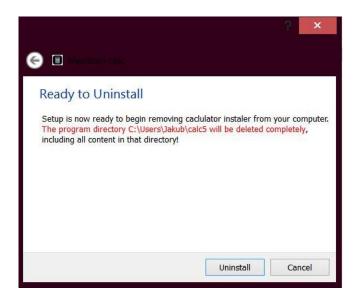

You can also use numeric keyboard for input

IV. Uninstallation manual

Click on uninstall and uninstaller will start and show this window.

After this window appears chose "remove all components" and click next.

In the next step click on uninstall. After that click on finish and calculator is uninstalled.
